### **Clinical Data Manager**

NewLink Genetics Corp. a biopharmaceutical company in Ames Iowa, developing new therapeutic alternatives for cancer patients, is seeking an experienced Clinical DBA/Data Manager to aid in the initial setup, validation, and long-term maintenance of our internal CDMS. NewLink remains steadfast in its primary focus to take novel treatments and diagnostics through the clinical trials process and bringing products to market.

#### **Requirements include:**

- Bachelor of Science degree in Life/Health Sciences or Computer Science, or equivalent combination of education and experience preferred
- Extensive experience with Oracle, as well as SQL, PL/SQL
- Preferable experience in the clinical or pharmaceutical industries, including clinical data management
- Preferable experience with R (or SAS)
- Preferable experience with Clintrial CDMS
- Strong interpersonal skills
- Strong written and verbal communication skills
- Ability to work individually with minimal supervision, as well as part of a multidisciplinary team

#### **Duties include:**

- Work with consultants and IT personnel to validate and implement Clintrial, and set up studies
- Coordinate CRF development with the Director of Clinical Affairs
- Manage Oracle/Clintrial activities for multiple studies
- Write and program edit checks
- Test and maintain databases
- Hiring and supervision of additional data management personnel
- Developing and enforcing Data Management SOP's

We offer an attractive compensation and benefits package with a generous PTO package, flexible work schedule, stimulating work opportunities and a supportive, diverse and friendly working environment.
