

Accenture Systems Integration & Technology Consulting Analyst - USA

Choose a career at Accenture and enjoy an innovative environment where challenging and interesting work is part of daily life. Accenture is one of the world's leading management consulting, technology services and outsourcing companies and we have entry-level consulting opportunities for graduates in Systems Integration & Technology Consulting.

Accenture's consulting workforce is involved in business consulting, process design work and the application of technologies to business. Working as a consultant at Accenture, you will build core business, technology and industry expertise helping to deliver world-class business and technology solutions that enable clients to become high-performance businesses.

As a consulting analyst, you will be part of the Systems Integration or Technology Consulting workgroup, focus mainly on project delivery, work across several industry groups and, develop a broad set of skills. You will be able to advance your career by developing specialized skills, following one of our distinct career paths enabling you to become an expert in your field of choice.

Systems Integration & Technology Consulting analysts typically support the delivery of large-scale, complex programs that marry processes with technology to help our clients achieve high performance. You'll specialize in the design, development, integration and delivery of functional and industry solutions and processes for clients based on existing packages such as SAP and PeopleSoft, Retek, or custom-built systems. Some business-oriented analysts may focus on the analysis of current processes and capabilities and the design and development of new processes and capabilities.

More technically-oriented analysts may focus on delivering technology innovation, by designing enterprise architecture and technology solutions, assessing and diagnosing technology environments, designing technology infrastructure such as networks, security and platforms, setting strategies, and tuning technology environments for optimal performance.

As a consulting analyst, your specific responsibilities may include:

- Assisting in analysis and documentation of as-is capabilities about business processes, people, technology, etc.
- Assisting in development and testing of new business processes, capabilities, and, as appropriate, their supporting technologies
- Developing deployment deliverables (communications, training, etc.)
- Performing application design activities (e.g., writing functional designs)
- Performing portions of technology architecture and infrastructure design activities
- Performing portions of technology build, test and deployment activities

Basic Qualifications:

- Bachelor's degree (with a graduation date no later than December 2008)

Job Requirements:

Track record of outstanding academic performance in one of following preferred majors:

- Engineering (all disciplines)
- Computer Science / Computer Engineering
- Information Systems / Decision Sciences
- Mathematics / Statistics / Sciences
- Finance / Accounting / Economics
- Business Marketing / Management
- Liberal Arts / Communications

We are seeking highly motivated individuals who meet the following criteria:

- Eagerness to contribute in a team-oriented environment
- Ability to work creatively and analytically in a problem-solving environment
- Desire to work in an information systems environment
- Ability to meet client travel requirements, when applicable
- Excellent leadership, communication (written and oral) and interpersonal skills

Based on your background and opportunities available, you may be considered for alternative entry level consulting analyst roles with similar qualifications in our Consulting workforce.

Applicants for employment in the U.S. must possess work authorization which does not require sponsorship by the employer for a visa.

Candidates who are currently employed by a client of Accenture or an affiliated Accenture business may not be eligible for consideration.

Accenture is an Equal Opportunity Employer.
