

JAVA & PHP PROGRAMMER WANTED!

Campus Part-time & Work Study Position

The University of Iowa WiderNet Project is in IMMEDIATE need of a Java & PHP Programmer to assist with a unique project creating digital libraries for developing countries.

- As a service organization dedicated to improving digital communications in developing countries around the world, the WiderNet Project developed a program that advocates information technology development through coaching and training at partner institutions.
- The WiderNet Project is responsible for the creation and distribution of the **eGranary Digital Library**, an offline digital resource that delivers millions of educational documents to developing countries where Internet access is minimal and expensive.
- Working continuously to develop new and innovative means of bridging the digital divide, the WiderNet staff carries out their mission of improving communication technologies in developing nations around the world.
- Working with the WiderNet Project is a **FUN and REWARDING EXPERIENCE** that enables staff to actively take part in spreading knowledge to the information poor through implementation of the eGranary Digital Library.

The WiderNet Project, which is part of the UI Library and Information Science Department, is located in room 201 of Communications Center, Iowa City, IA 52242.

Those interested in this gratifying and indispensable job opportunity with flexible hours should contact Office Manager Tracy Collins at 319-335-2200 to set up an interview.

Applicants should have a minimum of 2 years of Java programming experience and 1 year of PHP/MySQL programming is required. Experience working with content management systems and CVS is preferred. J2EE programming and experience with Maven and SVN would be a bonus.
