Q1:

- (a) $\text{travel}(X) : -\text{young}(X), \text{enterprising}(X).$
- (b) $\text{likes}(_, Y) : -\text{book}(Y), \text{wellwritten}(Y), \text{haspictures}(Y).$
 $\text{likes}(_, Y) : -\text{movie}(Y), \text{endshappy}(Y).$

Q2:

- (1) call $\text{abc}(a, b).$

$\text{abc}(a, b)$ is unified with the rule

$$\text{abc}(X, Y) : -\text{cde}(X, U), \text{efg}(V, U), \text{hij}(V, Y)$$

, which yield

$$\text{abc}(a, b) : -\text{cde}(a, U), \text{efg}(V, U), \text{hij}(V, b).$$

- (2) call $\text{cde}(a, U).$

$\text{cde}(a, U)$ is unified with the fact $\text{cde}(a, b)$

, which yield

$$\text{abc}(a, b) : -\text{cde}(a, b), \text{efg}(V, b), \text{hij}(V, b).$$

- (3) call $\text{efg}(V, b).$

$\text{efg}(V, b)$ is unified with the fact $\text{efg}(d, b),$

which yield

$$\text{abc}(a, b) : -\text{cde}(a, b), \text{efg}(d, b), \text{hij}(d, b).$$

- (4) call $\text{hij}(d, b).$ This goal fails.

- (5) redo $\text{efg}(V, b).$ This goal fails.

- (6) redo $\text{cde}(a, U).$

$\text{cde}(a, U)$ is unified with the fact $\text{cde}(a, c),$
which yield

$$\text{abc}(a, b) : -\text{cde}(a, c), \text{efg}(V, c), \text{hij}(V, b).$$

- (7) call $\text{efg}(V, c).$

$\text{efg}(V, c)$ is unified with the fact $\text{efg}(h, c),$
which yield

$$\text{abc}(a, b) : -\text{cde}(a, c), \text{efg}(h, c), \text{hij}(h, b).$$

- (8) call $\text{hij}(h, b).$ This goal succeeds.

- (9) The query $\text{abc}(a, b)$ succeeds.

Q3:

? – *consult(kennedy).*

% familial compiled 0.00 sec, 2,200 bytes

Yes

? – *birth(* $_, _$, P, $_, _$, 1961)).

P = *robin_Lawford;*

```

 $P = edward\_KennedyJr;$ 
 $No$ 
 $? - birth( \_, patricia\_Kennedy, C, \_, \_ ).$ 
 $C = christopher\_Lawford;$ 
 $C = sydney\_Lawford;$ 
 $C = victoria\_Lawford;$ 
 $C = robin\_Lawford;$ 
 $No$ 
 $? - halt.$ 

```

Q4:

```

 $? - consult(familial).$ 
% familial compiled 0.00 sec, 2,172 bytes
 $Yes$ 
 $? - consult(kennedy).$ 
% kennedy compiled 0.00 sec, 11,560 bytes
 $Yes$ 
 $? - brotherOf(X, john\_Kennedy).$ 
 $X = joseph\_KennedyJr;$ 
 $X = rosemary\_Kennedy;$ 
 $X = kathleen\_Kennedy;$ 
 $X = eunice\_Kennedy;$ 
 $X = patricia\_Kennedy;$ 
 $X = robert\_Kennedy;$ 
 $X = jean\_Kennedy;$ 
 $X = edward\_Kennedy;$ 
 $No$ 
 $? - parentOf(edward\_KennedyJr, P), brotherOf(P, Uncle).$ 
 $P = edward\_Kennedy$ 
 $Uncle = joseph\_KennedyJr;$ 
 $P = edward\_Kennedy$ 
 $Uncle = john\_Kennedy;$ 
 $P = edward\_Kennedy$ 
 $Uncle = robert\_Kennedy;$ 
 $No$ 
 $? - halt.$
