

## SAS test

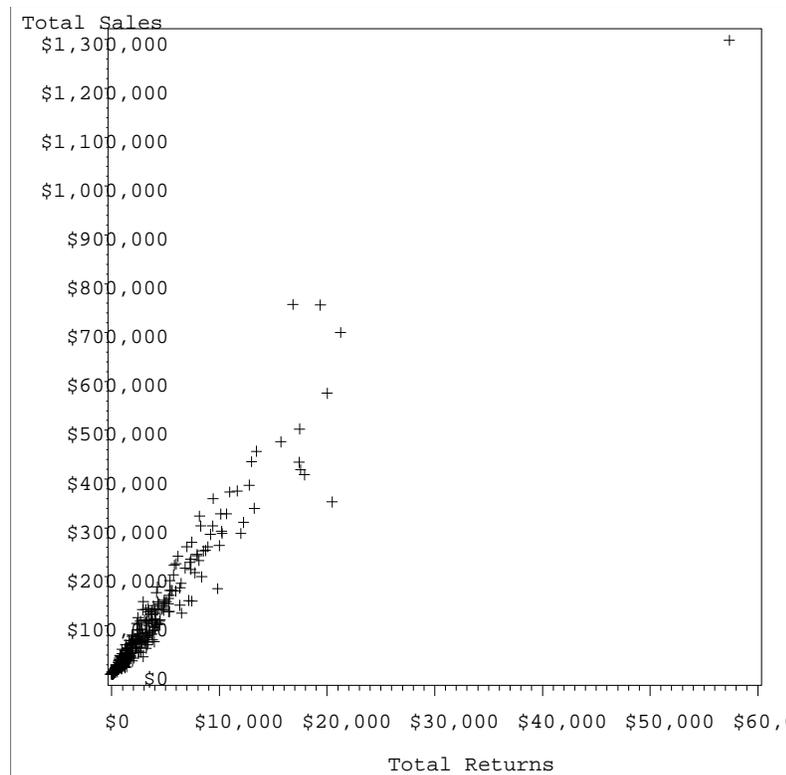

Analysis of one of the built-in datasets:

```
SAS> proc means n mean stddev  
SAS>     data = sashelp.shoes;
```

The MEANS Procedure

Variable	Label	N	Mean	Std Dev
Stores	Number of Stores	395	11.6481013	8.8736315
Sales	Total Sales	395	85700.17	129107.23
Inventory	Total Inventory	395	250898.86	351514.63
Returns	Total Returns	395	2967.32	4611.74

```
SAS> proc gplot data = sashelp.shoes;  
SAS>     plot sales * returns;
```

Right now, we have trouble with certain graphics formats, and the tick labels may overlap the plotting area. RVL hopes to figure this out before long.
